

A Division of Laxmi Dental Limited

Resins - Aligners - Retainers - Accessories - Machines

ABOUT US

One stop solution for all ortho-dental needs

We make thermoplastic sheets using cutting-edge technology with superior biomechanical properties engineered for precise tooth movement.

Taglus products are designed to meet expectations while maintaining high-quality standards. You can be assured of the best results with high efficiency, rapid workflow and shorter production time to improve your outcomes.

Committed to sustainability - we work towards establishing synergy between our products and nature.

MISSION

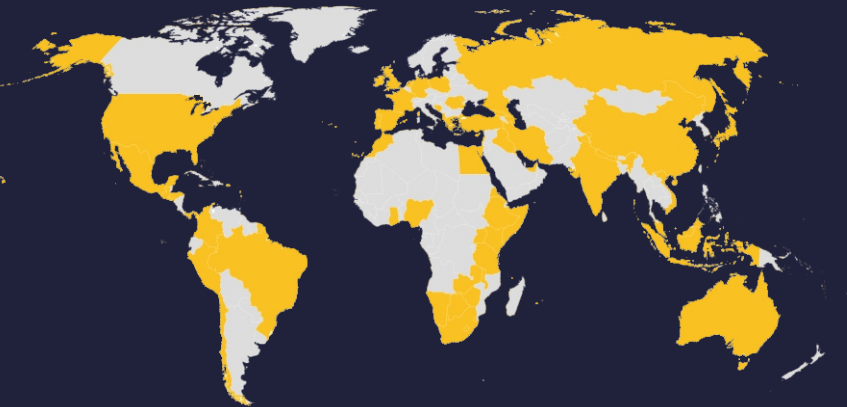

To offer innovative production solutions for dental laboratories and practices globally.

VISION

To help scale dental businesses by being the best-in-class products through innovation, unmatched quality and the highest standards of service through our products.

VALUES

We pioneer innovation, craft with precision and ensure trust through reliability. Our customer-first approach drives excellence, while sustainability shapes our journey.
